## Public Opinion Survey: Residents of Georgia

April 10-22, 2018

### **Detailed Methodology**

- The survey was conducted by Dr. Rasa Alisauskiene from the public and market research company <u>Baltic</u> <u>Surveys/The Gallup Organization</u> on behalf of the <u>Center for Insights in Survey Research</u>. The fieldwork was carried out by <u>IPM Research, Ltd</u>.
- Data was collected throughout Georgia (excluding the occupied territories of Abkhazia and South Ossetia) between April 10-22, 2018, through face-to-face interviews at respondents' homes.
- The sample consisted of 1,500 permanent residents of Georgia older than the age of 18 and eligible to vote. It is representative of the general population by age, gender, region and size/type of settlement.
- A multistage probability sampling method was used, employing the "random route" and "next birthday" respondent selection procedures.
  - Stage one: All districts of Georgia are grouped into 10 regions. The survey was conducted throughout all regions of Georgia, except for the occupied territories of Abkhazia and South Ossetia. The city of Tbilisi was treated as a separate region.
  - Stage two: The territory of each region was split into settlements and grouped according to subtype (i.e. cities, towns and villages).
    - Settlements were selected at random.
    - The number of selected settlements in each region was proportional to the share of population living in a particular type of the settlement in each region.
  - Stage three: Primary sampling units were described.
- The margin of error does not exceed plus or minus 2.5 percent for the full sample. Data are weighted by the variables of gender, age, region and size of the settlement using the latest data from Geostat.
- Response rate was 71 percent.
- Charts and graphs may not add up to 100 percent due to rounding.
- The survey was funded by the U.S. Agency for International Development.
