# Ukrainian Municipal Survey

March 2-20, 2015

International Republican Institute

The Government of Canada

## The First Ever In-Depth Look at Ukrainian Local Governance

- This poll provides an unprecedented window on citizen attitudes about local governance and municipal services.
- It was conducted in the 22 regional capitals of Ukraine not under the control of Russian or Russianbacked forces, utilized an extensive sample size of more than 17,000 respondents.
- The findings will inform future discussions on decentralization, anti-corruption initiatives and other reforms set forth by the pro-European government in Kyiv.

### Geographical Key

NOTE: Regional names also denote regional capital names unless otherwise indicated on the map.

Due to the Russian occupation of Crimea and the ongoing conflict in eastern Ukraine, residents of the cities of Donetsk, Luhansk and Simferopol were unable to be included in this poll.

Surv	vey Contents	Page No.
	Methodology	5
	Concern About Corruption and Nepotism	6
	Commitment to Move Ukraine towards the West	16
	Citizen Participation in Governance	19
	Trust in National Leaders	50
	Approval of and Satisfaction with Officials and Institutions	55
	Accessibility of Information from City Authorities and Institutions	76
	Quality of Local Services	86
	City Council Performance	106
	Interaction with City Government Offices	114
	Local and National Initiatives	119
	Local or National Responsibility	124
	Elections	141
	Moods and Attitudes	149
	Demographics	155

### Methodology

- This survey was conducted on behalf of the <u>International Republican Institute</u> by the <u>Rating Group</u> <u>Ukraine</u>; the data was analyzed and reports were prepared by the public opinion and market research company <u>Baltic Surveys/The Gallup Organization</u>.
- Data was collected in 22 Ukrainian cities (Kyiv and all regional capitals, except Donetsk, Luhansk and Simferopol) between March 2-20, 2015, through face-to-face interviews at respondents' homes. The data is from regional capitals, not the entire region.
- The total number of interviews was 17,600 (800 interviews in each city). The target group was permanent residents of Ukraine older than 18 years and eligible to vote. The sample is representative of the population of cities by age and gender.
- In order to obtain a representative sample, 800 respondents were interviewed in each city regardless of the size of its population. The survey data obtained in each city was weighted by gender and age using national statistical data. The geographical coverage of the city area was based on the electoral districts established by the Central Election Commission of Ukraine. At least 50 sites, or primary sampling units, were covered and randomly selected in each city.
- Probability sampling method was used with the random route and next birthday respondent's selection procedures in each of 22 surveyed cities.
- The margin of error for each city does not exceed plus or minus 3.5 percent.
- The response rate was 58 percent.
- Charts and graphs may not add up to 100 percent due to rounding.
- The survey was funded by Foreign Affairs, Trade and Development Canada.

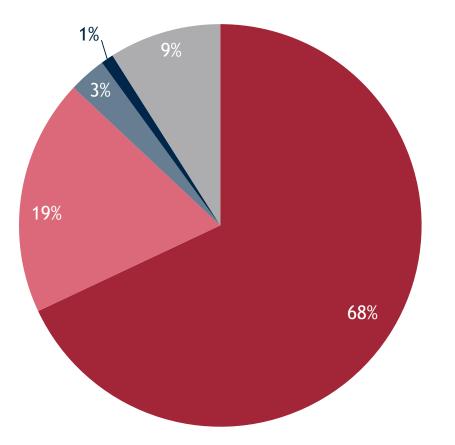

# Concern About Corruption and Nepotism
