### Background

The International Republican Institute (IRI) is a nonprofit, nonpartisan, organization dedicated to advancing freedom and democracy worldwide. Since 1983, IRI has worked to develop democratic institutions and ideals, carrying out a variety of international programs to promote freedom, self-government and the rule of law worldwide. IRI provides technical assistance in the areas of political party strengthening, developing civic institutions and open elections, promoting democratic governance and advancing the rule of law.

IRI's Strengthening Citizen Security through Transparency and Accountability program seeks to work with Mexican officials from all levels of government, civil society organizations (CSOs), universities, private sector and citizens, to promote transparency, citizen participation and accountability in violence prevention initiatives in the states of Nuevo Leon and Coahuila.

In Mexico, very few citizens participate or know about channels of participation to collaborate with authorities in crime prevention initiatives and the solution of other social issues. To reduce this lack of knowledge, the Strengthening Citizen Security through Transparency and Accountability program aims to engage in a campaign to create awareness among all sectors of society to incentivize participation in public policies geared to reducing and preventing violence.

The program will use a communications toolkit will facilitate the dissemination of open government and crime prevention initiatives among the population through different means of communication and tangible informative materials. The main idea is that the majority of the population can become aware of the crime prevention processes and relevant open government initiatives that currently exist and of existing channels for participation.

**Evaluation and Award Process**

1. IRI may contact any Bidder for clarification or additional information, but Bidders are advised that IRI intends to evaluate the offers based on the written proposals, without discussions, and reserves the right to make decisions based solely on the information provided with the initial proposals. IRI may but is not obligated to conduct additional negotiations with the most highly rated Bidders prior to award of a contract, and may at its sole discretion elect to issue contracts to one or more Bidders.
2. Mathematical errors will be corrected in the following manner: If a discrepancy exists between the total price proposed and the total price resulting from multiplying the unit price by the corresponding amounts, then the unit price will prevail and the total price will be corrected. If there is a discrepancy between the numbers written out in

words and the amounts in numbers, then the amount expressed in words will prevail. If the Bidder does not accept the correction, the offer will be rejected.

3. IRI may determine that a proposal is unacceptable if the prices proposed are materially unbalanced between line items or sub-line items. Unbalanced pricing exists when, despite an acceptable total evaluated price, the price of one or more contract line items is significantly overstated or understated as indicated by the application of cost or price analysis techniques. A proposal may be rejected if IRI determines that the lack of balance poses an unacceptable risk.
4. IRI will conduct a source selection based as follows:

IRI intends to make an award to the responsible Bidder based on the following evaluation factors:

- a) Technical evaluation, (including technical capabilities, proposed technical approach, and personnel qualifications) – 45 percent
- b) Past performance and experience in performing similar projects – 30 percent
- c) Price – 25 percent

IRI intends to evaluate Bidders' proposals in accordance with these factors and make an award to the responsible Bidder whose proposal is most advantageous to the program.

5. If a cost realism analysis is performed, cost realism may be considered in evaluating performance or price.
