Public Opinion Survey: Residents of Armenia

February 2021
Detailed Methodology

• The survey was conducted on behalf of “International Republican Institute’s” Center for Insights in Survey Research by Breavis (represented by IPSC LLC).

• Data was collected throughout Armenia between February 8 and February 16, 2021, through phone interviews, with respondents selected by random digit dialing (RDD) probability sampling of mobile phone numbers.

• The sample consisted of 1,510 permanent residents of Armenia aged 18 and older. It is representative of the population with access to a mobile phone, which excludes approximately 1.2 percent of adults.

• Sampling frame: Statistical Committee of the Republic of Armenia. Weighting: Data weighted for 11 regional groups, age, gender and community type.

• The margin of error does not exceed plus or minus 2.5 points for the full sample.

• The response rate was 26 percent which is similar to the surveys conducted in August-September 2020.

• Charts and graphs may not add up to 100 percent due to rounding.

• The survey was funded by the U.S. Agency for International Development.
