Background

The International Republican Institute (IRI) is a nonprofit, nonpartisan, organization dedicated to advancing freedom and democracy worldwide. Since 1983, IRI has worked to develop democratic institutions and ideals, carrying out a variety of international programs to promote freedom, self-government and the rule of law worldwide. IRI provides technical assistance in the areas of political party strengthening, developing civic institutions and open elections, promoting democratic governance and advancing the rule of law.

To build resiliency against kleptocratic practices, the International Republican Institute (IRI) is developing a taxonomy of kleptocratic strategies and associated tactics employed by corrupt leaders around the world. To understand the role of actors in destination countries aiding kleptocracy, and effective counter strategies to mitigate their effectiveness, IRI is seeking to contract an expert to identify, document, and analyze the role of transit and destination countries in aiding kleptocracy practices, provide short case examples and recommend approaches to counter such practices.

Period of Performance

Two months from date of signature.

- Recommendations on specific courses of action which could be undertaken by non-state actors to counter such kleptocratic practices at the national and regional level, including documented successful examples.
- The analysis should comprise both traditional (Western/OECD countries and offshore financial centers) and emerging or non-traditional jurisdictions (e.g., Panama, Dubai), describing similarities and differences among the two types of destination countries in terms of tactics and courses of action recommended.

Evaluation and Award Process

1. IRI may contact any Bidder for clarification or additional information, but Bidders are advised that IRI intends to evaluate the offers based on the written proposals, without discussions, and reserves the right to make decisions based solely on the information provided with the initial proposals. IRI may but is not obligated to conduct additional negotiations with the most highly rated Bidders prior to award of a contract, and may at its sole discretion elect to issue contracts to one or more Bidders.
2. Mathematical errors will be corrected in the following manner: If a discrepancy exists between the total price proposed and the total price resulting from multiplying the unit price by the corresponding amounts, then the unit price will prevail and the total price will be corrected. If there is a discrepancy between the numbers written out in words and the amounts in numbers, then the amount expressed in words will prevail. If the Bidder does not accept the correction, the offer will be rejected.
3. IRI may determine that a proposal is unacceptable if the prices proposed are materially unbalanced between line items or sub-line items. Unbalanced pricing exists when, despite an acceptable total evaluated price, the price of one or more contract line items is significantly overstated or understated as indicated by the application of cost or price analysis techniques. A proposal may be rejected if IRI determines that the lack of balance poses an unacceptable risk.
4. IRI will conduct a source selection based as follows:

- c) Price – **25 percent**

IRI intends to evaluate Bidders’ proposals in accordance with these factors and make an award to the responsible Bidder whose proposal is most advantageous to the program.
