Background: The International Republican Institute (IRI) is a nonprofit, nonpartisan, organization dedicated to advancing freedom and democracy worldwide. Since 1983, IRI has worked to develop democratic institutions and ideals, carrying out a variety of international programs to promote freedom, self-government and the rule of law worldwide. IRI provides technical assistance in the areas of political party strengthening, developing civic institutions and open elections, promoting democratic governance and advancing the rule of law.

Building from IRI's previous project in Mbizana South Africa, IRI is working to enhance more transparent, accountable and effective resource governance in South Africa, the Institute aims to improve citizen knowledge and understanding around mining contracts and empower them to engage more actively in the decision-making process. IRI requires a local partner organization to support the project and connect local government to citizens and increase the capacity of local government officials to better understand their role in enabling greater citizen participation and engagement on key issues around the extractive resource industry.

Eligibility: Organizations

Period of Performance: June 1, 2020 – August 30, 2020

Statement of Work:

- IRI requires a local partner to carry out the following Scope of Work for the resource governance focused project, targeting Mbizana, South Africa in the Easter Cape Province. The local partner should have previous experience working in the Mbizana province with citizens and local officials and demonstrate a clear past performance record conducting similar activities working with these stakeholders.
- The partner should ideally have past experience working on resource governance issues in South Africa, including working with private sector mining companies, and be able to demonstrate this to IRI. The local partner will be expected to carry out the following scope of work:

Local Governance Technical Trainings

- The local partner institution will work with the local authority in Mbizana to increase its capacity to respond to citizen needs and enhance the community's role in natural resource decision making.
- The objective of this activity is to provide technical assistance tailored according to findings from the initial baseline mapping exercise; including resources and tools, for local officials to utilize for better connection with constituents and support local government to address challenges in their municipality.
- The selected local partner institution will develop technical training modules' and train local officials on these tools through two technical consultations (2).

Community Engagement Forums

- The local partner institution will facilitate one forum engagement exercise between local government officials, the community, and private sector representatives. At the forum, a briefing on the baseline findings will lead to a subsequent facilitated discussion on how mining contracts impact their community and mechanisms to improve upon the challenges uncovered in the findings.
- Local government officials and private sector representatives will have the opportunity to hear their constituents' concerns; engage with the community on potential solutions to improving their overall participation in the mining sector and share relevant information to increase transparency on the sector.
- At the end of the forum, the local partner institution must facilitate a draft action plan which will provide a roadmap for next steps to be used to help officials prioritize improvements in their communities and that citizens can use to hold officials and the private sector accountable in the implementation of mining contracts.

Each application should also have a detailed explanation of why the budgeted amounts are necessary for completing the scope of work. The total amount budgeted for this project must not exceed \$15,000.00 USD.

All one-time and recurring costs must be fully described in the budget. Rates should be quoted, inclusive of all but showing separately, costs of inspection, services, transportation, taxes, import duties if any and other levies.

- *Personnel* – In general, employees receiving benefits from the applicant organization are considered staff. Consultants hired to assist with the program, who do not receive benefits, should be included under contractual. Identify staffing requirements by each position title and brief description of duties. For clarity, please list the annual salary of each position, percentage of time and number of months devoted to the project. (e.g., Administrative Director: \$30,000/year x 25% x 8.5 months; calculation: $\$30,000/12 = \$2,500 \times 25\% \times 8.5 \text{ months} = \$5,312.5$).
- *Travel* - Staff and any participant travel:
 - International airfare
 - In-country travel (not in the United States)
 - Domestic travel in the United States, if any
 - Per diem/maintenance: includes lodging, meals and incidentals for both participant and staff travel. Rates of maximum allowances for U.S. and foreign travel are available from the following website:
<http://www.gsa.gov/portal/category/21287> and

however, institutions may use per diem rates lower than official government rates.

- Please explain differences in fares among travelers on the same routes (e.g., project staff member traveling for three weeks whose fare is higher than that of staff member traveling for four months). Please note that all travel, where applicable, must be in compliance with the Fly America Act. For more information see <http://www.gsa.gov/portal/content/103191>.
- *Supplies* - List items separately using unit costs (and the percentage of each unit cost being charged to the grant) for photocopying, postage, telephone/fax, printing, and office supplies (for example, Telephone: \$50/month x 50% = \$25/month x 12 months).
- *Contractual* – Estimate the direct costs for items such as translation, interpretation, honoraria, local hires, legal fees, accounting/audit services, and any other contractual work that will be needed as part of the project.
 - *Consultant Fees*: For example lecture fees, honoraria, travel, and per diem for outside speakers or external evaluators: list number of people and rates per day (for example, 2 x \$150/day x 2 days).
- *Other Direct Costs*- these will vary depending on the nature of the project. The inclusion of each should be justified in the budget narrative. Audit costs can be included if they are not part of the indirect pool and only the portion of the cost associated with this program.
- *Indirect/Overhead Costs* – applicants can choose to budget directly for costs such as rent, utilities, technology, human resources and other general operating costs, or a de minimis rate of 10% can be applied to the total amount of direct expenses budgeted.

2: Milestone Budget: Using the format below, provide the estimated timeline of activities and corresponding payments:

Milestone	Description of Milestone	Required Deliverable	Estimated Date of Completion	Amount
1				\$
2				\$
3				\$
4				\$
5				\$
...				\$

Evaluation and Award Process:

1. Applications will be evaluated by IRI for compliance with administrative requirements, previous experience of similar projects by the Applicant, technical capacity, the qualifications of the personnel for the project, and prices. IRI may contact the Applicant’s previous clients and may obtain any information related to other projects that the Applicant has executed. IRI may contact any applicant for clarification or additional information, but Applicants are advised that IRI reserves the right to make decisions based solely on the information provided with the applications. IRI may but is not obligated to conduct additional negotiations prior to

issuance of a contract, and may at its sole discretion elect to issue contracts to one or more applicants.

2. Mathematical errors will be corrected in the following manner: If a discrepancy exists between the total price proposed and the total price resulting from multiplying the unit price by the corresponding amounts, then the unit price will prevail and the total price will be corrected. If there were a discrepancy between the numbers written out in words and the amounts in numbers, then the amount expressed in words will prevail. If the Applicant does not accept the correction, the offer will be rejected.
3. IRI may determine that an application is unacceptable if the prices proposed are materially unbalanced between line items or sub-line items. Unbalanced pricing exists when, despite an acceptable total evaluated price, the price of one or more contract line items is significantly overstated or understated as indicated by the application of cost or price analysis techniques. An application may be rejected if IRI determines that the lack of balance poses an unacceptable risk.
4. IRI will conduct a Technical/Price Weighted evaluation and source selection based on evaluation factors listed below. Technical evaluation factors have a total of 75 points; price evaluation has a total of 25 points. These factors will serve as the standard against which all technical information will be evaluated, and identify the determination factors that Applicants should address. IRI intends to evaluate applications in accordance with the Statement of Work of this RFA and make an award to the Applicant achieving the highest combined score proposal (technical and cost), demonstrating both technical compliance and price reasonableness.
5. If a cost realism analysis is performed, cost realism may be considered in evaluating performance or price.

Evaluation of Applications:

1. The applications will be evaluated by a technical evaluation committee using the criteria shown below. When evaluating the competing applications, IRI will consider the written technical/capability information provided by the applicants, and any other information obtained by IRI through its own research.
2. The criteria listed below are presented by major category, so that Applicants will know which areas require emphasis in the preparation of their applications.
