## Background:

The International Republican Institute (IRI) is a nonprofit, nonpartisan, organization dedicated to advancing freedom and democracy worldwide. Since 1983, IRI has worked to develop democratic institutions and ideals, carrying out a variety of international programs to promote freedom, self-government and the rule of law worldwide. IRI provides technical assistance in the areas of political party strengthening, developing civic institutions and open elections, promoting democratic governance and advancing the rule of law.

International Republican Institute (IRI) Nigeria, is implementing a 12-month project entitled “Mapping Actors to Reduce Identity Conflict”. The project seeks to improve interventions aimed at reducing identity-based violence in Nigeria. The Institute will partner with local researchers to gather data on the landscape of relevant non-state actors in each of three regions in Nigeria that are beset by identity-based conflict with inadequate levels of attention to these dynamics in the South East. The data will capture attributes of these non-state actors, and will be updated monthly. The Institute will use this data and analysis to assist political parties, legislators, and relevant government agencies to design strategic, evidence-based interventions. The Institute will also use this data to strategically convene government and non-governmental stakeholders in certain regions where the evidence indicates such activities could yield positive results.

## Period of Performance:

From date of signature to May 31, 2024.

## Statement of Work:

IRI is seeking research services to gather data on the landscape of relevant non-state actors in the **South East** in Nigeria that are beset by identity-based conflict with inadequate levels of attention to these dynamics. • Furthermore, based on a selection criterion previously developed by IRI, the contractor will be expected to provide IRI with a list of key individuals who they recommend could participate in the key informant interviews, which IRI will vet.
• Provide IRI a monthly research report update (IRI will provide the mapping template to be used). This report shall contain a Monthly analysis of the data gathered through the key informant interviews and desk research and will include sections of descriptive analysis of the data, visualization of the data, network analysis, and written analysis.
• The report should also contain a section of month-to-month trend analysis as new data is gathered through the research’s period of performance.
• The contractor will also be expected to input the report’s data onto an advanced data collection tracking system that IRI will provide.
• Analyze data submitted monthly under the program.
