YOUTH OPINION SURVEY

June-July 2023
The survey was conducted by Info Sapiens on behalf of the International Research and Exchanges Board (IREX). Survey data was reviewed and analyzed by the International Republican Institute’s Center for Insights in Survey Research (CISR).

The survey was conducted from June 30 to July 14, 2023 through telephone (CATI) interviews. Mobile phone numbers were selected using RDD (random digit dialing). The codes of all main operators in Ukraine were used.

The sample consists of a national sample of n=1,417 youth aged 16-35, a national sample of n=502 children aged 10-12, and a national sample of n=525 children aged 13-15. These samples are representative of the population of the Ukraine of the respective age.

Due to the absence of reliable information on the population as for now, the latest available pre-invasion data from State Statistical Service as of January 1, 2022 were used to set oblast quotas and to weight the dataset by age, gender, region, and settlement size. Respondents were asked to name their current place of residence and their place of residence before February 24, 2022.

The theoretical margin of error does not exceed ±4.4% for youth aged 10-12 and youth aged 13-15. The theoretical margin of error does not exceed ±2.6% for youth aged 16-35.

The overall response rate is 3%.

Charts and graphs may not add up to 100% due to rounding.

This study was made possible by the generous support of the American people through the United States Agency for International Development (USAID). The contents are the responsibility of IRI and do not necessarily reflect the views of IREX, USAID or the United States Government.
Ethical Research Protections

The protocol for Youth Opinion Survey 2023 was assessed through an expedited research ethics review by HML Institutional Review Board. This study’s human subjects’ protection protocols received research ethics review approval on 05/31/2023 in accordance with the requirements of the US Code of Federal Regulations for the Protection of Human Subjects (45CFR46 & 45CFR46.110) and were expedited by (7) Research on individual or group characteristics or behavior. HML IRB is authorized by the U.S. Department of Health and Human Services, Office of Human Research Protections (IRB #00001211, IORG #0000850), and has DHHS Federal-Wide Assurance approval (FWA #00001102).

Verbal informed consent has been received from all respondents. For the category of 10-15 years old, the youngest category within the survey, consent has been received from parents or legal guardians. A consent form included information on the survey topic, confidentiality, voluntary participation, rights to not answer some or any questions and refusal to participate at any moment.

Info Sapiens team members have experience surveying under-aged people since 2006. All interviewers participated in briefing sessions before the survey, where they were trained to conduct interviews with minors.

Info Sapiens complies with its policies on child protection during participation in research activities, national legislation and European Society for Opinion and Marketing Research guidelines. An external expert in conducting surveys with children, Maryna Ohorodniichuk - a psychologist specializing in client-centered therapy, author and instructor of training courses for psychologists and parents, member of the Ukrainian Association of Psychotherapists, was involved in data collection tools development.

All interviews were conducted using CATI (Computer-assisted telephone interviewing) method. Info Sapiens have not stored personal information on participants.
