Public Opinion Poll: Dobrich
September-October 2023
Methodology

- The survey was conducted on behalf of the International Republican Institute’s Center for Insights in Survey Research by ESTAT.

- Data was collected between September 21 and October 9, 2023, through CAPI administered face-to-face interviews in respondents’ homes.

- The sample consisted of n=300 adults, who are 18 years or older, residents of the municipality of Dobrich-City, Bulgaria, and have voting rights. The sample excluded residents detained in custody or currently in prison.

- A multi-stage probability sampling method was used to design a municipally representative sample. The sample was stratified by urban/rural residency, followed by random selection of primary sampling units (PSUs) within each stratum. Households were selected by random walk in each of the 30 PSUs, and respondents were selected by the last birthday method. The sampling frame was based on the 2021 Population and Housing Census.

- The achieved sample was weighted for gender, age group, and type of settlement.

- The response rate was 43 percent.

- The margin of error for the mid-range of the full sample does not exceed ±5.7 points.

- Charts and graphs may not add up to 100 percent due to rounding. Cited bases are weighted.
In general, would you say that Dobrich municipality is heading in the right direction or in the wrong direction?

- 47% in the right direction
- 37% in the wrong direction
- 16% don't know/refused
